

ADITYA SESWANI

Software Engineer — Full-Stack Developer & Automation

Indore, Madhya Pradesh | +91 99763 84000 | seswaniaditya@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Education

VIT Bhopal University

Bachelor of Technology in Computer Science and Engineering

Bhopal, India

2024 – 2028

CGPA: 8.60 | Reliance Foundation Undergraduate Scholar

Experience

ShadowFox

Web Development Intern

Remote

2026

Engineered responsive web applications using React and Node.js, improving UI load times by 15% through code splitting.

Architected scalable backend REST APIs and integrated clean UI components for enhanced user engagement.

EduLinkUp

Front-End Web Development Intern

Remote

2026

Developed modern, responsive user interfaces using Tailwind CSS, reducing CSS bundle size by 30% across 5+ modules.

Facilitated technical demonstrations for frontend concepts, improving team communication and project delivery speed.

Edunet Foundation (IBM SkillsBuild)

AI/ML Intern

Remote

2025

Completed intensive training in AI/ML, implementing practical models using IBM Cloud and Watson services.

Built predictive models utilizing IBM Cloud resources, achieving a 10% increase in model accuracy during evaluation.

Technical Skills

Languages: C++, Python, Java, JavaScript, PHP, SQL

Frameworks/Tools: Node.js, Express.js, React, Git, GitHub, PyQt, PyAutoGUI, Docker

Web: HTML5, CSS3, Tailwind CSS, AJAX, REST APIs

Databases & ML: MySQL, MongoDB, NLP, Automation, System APIs, IBM Cloud

Projects

OFFLINE JARVIS — AI DESKTOP ASSISTANT | Python, PyQt, NLP

[GitHub](#)

- Developed a privacy-focused offline AI assistant with 25+ features, including wake-word activation and system automation.
- Integrated multi-step workflows for Spotify, WhatsApp, and system monitoring using local LLMs for 100% offline inference.

AVIPRO TRAVELS | Full Stack, PHP, MySQL

[GitHub](#) | [Live Demo](#)

- Built a CMS-based travel platform that increased booking efficiency by 40% through an automated admin management system.
- Implemented secure JWT authentication and responsive design, serving 200+ mock transactions during testing.

CODESCOPE | Python CLI, PyPI

[GitHub](#) | [PyPI](#)

- Created a PyPI-distributed CLI tool generating 5+ types of code metrics and dependency visualizations.
- Automated static code analysis, reducing manual review time by 25% for open-source Python projects.

FAILFORWARD | Node.js, MongoDB, JWT

[GitHub](#) | [Live Demo](#)

- Developed a full-stack productivity app with real-time analytics dashboards and activity tracking for 100+ beta users.

Achievements & Certifications

Internship Offers: Selected for multi-domain roles at Robokwik.com and EI Systems via AICTE Portal.

Hackathons: Participant in SIH & Health Hack; collaborated in teams of 6 to build prototypes in 36 hours.

Certifications: Oracle Cloud (Generative AI, Data Science, AI Foundations), IBM AI Fundamentals, NPTEL Cloud Computing, Marketing Analytics.
